Who We Are

Moore Solutions (trading name of Sanbra Pty Ltd) is a Cairns-based security, surveillance and network integration company. Our core services are CCTV, alarms, intercoms and access control — built on a foundation few competitors can match.

Before founding Moore Solutions, our director spent years as a network engineer maintaining internet, Wi-Fi and video-on-demand infrastructure across more than 50 hotels and resorts on the Gold Coast and Northern NSW — including major chains such as Hyatt, Marriott and Sanctuary Cove. That work meant designing networks that had to perform flawlessly for thousands of guests, every day, with zero tolerance for downtime.

That background is a natural career progression into security and surveillance. Every camera, alarm and access point sits on a network, so understanding bandwidth, switching and Wi-Fi design isn't an add-on — it's the foundation everything else is built on. We diagnose issues correctly the first time and build systems to perform for years, not just pass a handover inspection.

What Our Clients Need

- **Reliable systems that work after-hours, unattended, and in remote or off-grid locations**
- Clean, professional installation — concealed cabling, no exposed conduit, compliant with ISO and AS wiring standards

- A provider who understands networking, not just hardware — correct diagnosis when something goes wrong
- Fast local response and ongoing maintenance, not a call centre interstate
- Systems that scale — from a single school building to a multi-site hotel or government rollout

Our Services

CCTV & Surveillance	Camera design and installation, remote monitoring, night vision, motion detection
Alarms	Intrusion detection, monitored and self-monitored alarm systems
Intercoms & Access Control	Video intercoms, keypad and card access, gate automation integration
Networks & Infrastructure	Structured cabling (Cat6 / Cat6A), PoE switching, comms racks, Wi-Fi and network design, troubleshooting
Power Resilience	Solar-powered and off-grid camera systems for sites without mains power or internet
Ongoing Support	Maintenance contracts, system health checks, fast local response, remote diagnostics

Where We Work

Moore Solutions is based in Cairns and services the full Far North Queensland region — from Townsville in the south to the tip of Cape York, including the Atherton Tablelands and coastal communities in between.

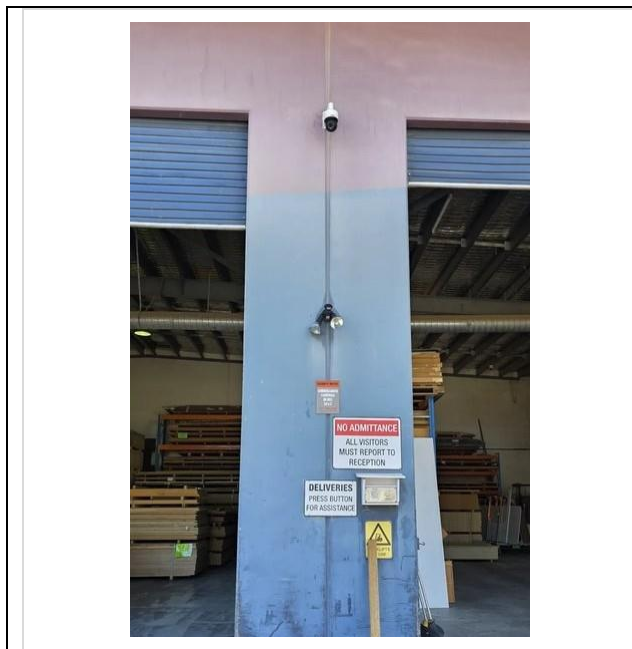

Why Moore Solutions Is Different

15+ years' network engineering background — not just camera installers	25+ years combined local FNQ industry experience
Licensed security installer and working-at-heights certified	Local Cairns-based team — fast response, no fly-in contractors
Neat, concealed cabling to ISO and AS wiring standards	Majority female-owned local small business
True end-to-end capability: design, supply, install, maintain	Authorised installer — Provision-ISR and Ajax Systems

Cheap, poorly specified systems routinely fail when they matter most — missed footage, no night vision, recording dropouts in bad weather, and no one to call when they fail. We specify professional-grade equipment, install it correctly, and stand behind it with ongoing support packages.

On Site — Real Installations

Warehouse and loading bay coverage with clear signage

Mobile solar surveillance trailer — available for hire on construction sites

Major Projects & Organisations We've Worked With

A selection of government, education, hospitality, construction and commercial clients across Cairns and Far North Queensland.

We have also supported Queensland Parks and Wildlife Service, Mission Australia, Dundee’s Waterfront Dining, Cairns Secure Parking and BIG4 Holiday Parks.

What Our Clients Say

Reviews from verified Google customers.

“We have used Moore Solutions across several different sites — Craig consistently delivers great service and quality products. Highly recommended.”

— Embe Construct, Google review

“Craig planned, quoted, supplied and installed our security cameras. The process was smooth and efficient, and the work was neat, tidy and very professional.”

— Barry Cheshire, Google review
